

## EntericBio<sup>®</sup> realtime

### Combined

- Salmonella
- Shigella
- Campylobacter
- VTEC
- Yersinia
- Vibrio
- Cryptosporidium
- Giardia
- Entamoeba histolytica

The EntericBio Molecular system is rapid, reliable and easy to use, providing results within 3 hours direct from faecal samples.

The system can process 1-48 samples per run with up to 276 patient samples in under 8 hours with no DNA/RNA extraction, automated setup and lyophilised ready to use assays.

# EntericBio® realtime
